

Product Information

Free of GMO cross contamination

To Whom it may concern

Akucell® Cellulose Gum grades meet the purity criteria for use in food products set forth by the Food and Agricultural Organization of the World Health Organization (FAO/WHO), by the Scientific Committee for Food of the European Commission and by the Food Chemicals Codex of the USA.

In our production facility in the Netherlands we produce both GMO and non-GMO cellulose gums. Akzo Nobel Functional Chemicals B.V. declares that non-GMO product is not contaminated with GMO containing product.

In order to avoid cross contamination we have extensive cleaning procedures and procedures for production order. These procedures are part of our quality control system.

Yours sincerely,

Akzo Nobel Chemicals AG
